

Setting up Gmail using IMAP

Most of Clarkson's users will be happy and most successful using the Gmail web client available at <http://mail.google.com>. However; there are a few folks who may have the need to set up Gmail in another client, such as Outlook or Thunderbird. The instructions are linked below. You will need to follow each step by choosing the appropriate option.

Please note: OIT does not recommend or support the use of IMAP with Outlook, Thunderbird, etc.
