

Audio Visual

- [IT Coordination for University Events](#) IT managers will consult with event planners to ensure effective delivery of IT services for supported University events. This consultation will typically include: audio-visual dry-runs, event scripting for live production events, recommendations for screen and speaker placement for event spaces, etc. Eligibility: Faculty Staff Cost: There is no cost associated with this service. Status: Active – A fully-supported, production service. Support: Service Desk – ...
- [Classroom Equipment](#) Most classroom audio-visual equipment on campus is operated using a standardized touch panel system to control the installed projection equipment. Our staff of A/V technicians will provide immediate assistance if issues arise with equipment during a class. However, instructors, faculty, speakers and/or TAs are encouraged to familiarize themselves with the audio-visual equipment in the classrooms ...
- [Equipment Setup](#) AV support is available for University sponsored events including conferences, large meetings, concerts and special events. Due to demand, we are unable to support recurring student organization meetings, student sponsored parties, intramural games or tournaments, and public showings of television broadcasts. AV support for supported special events is available on a fee-for-use basis. Because each event ...
- [New Facility Installation](#) Our staff of audio-video technicians will occasionally perform new equipment installations at various venues across campus. Typically, this involves hanging projection screens, projectors and control equipment in departmental conference rooms and meeting spaces. These installations are conducted after extensive consultation with our audio-video team. Eligibility: Faculty Staff Status: Active – A fully-supported, production service. Support: Service Desk – To open an IT support request, ...
