

Adobe Connect: Sharing YouTube Video

You can not share a YouTube video inside an Adobe Connect meeting room and have consistently, reliable results.

Two options are:

1. You can use the Web Links pod to force attendees' browsers to open a designated URL.
Here's how: http://help.adobe.com/en_US/connect/9.0/using/WS11d1def534ea1be08a52b610b38bfaa95-7f4c.html
2. You will need to convert the YouTube to an MP4, then upload the MP4 file to a Share pod and play the file.

To successfully convert a YouTube video to an MP4 so that it can be played AND recorded inside an Adobe Connect Meeting Room, go to youtubedownloader.com, Install the Free YouTube Downloader program.

- Enter the YouTube URL or selected file, and select Output format: No Conversion (MP4)
- Click Download
- Go to Adobe Connect Meeting Room
- Open Share Pod
- Browse for File, Upload and Done!
