

# Importing a SCORM file

Use the steps below to import a SCORM file into a Moodle course.

## Step-by-step guide

To import a SCORM file into a Moodle course:

1. Click  from the top right corner of the course.
2. Click  at the bottom of the topic where you would like to add the SCORM file.
3. Select  from the list of activities and resources then click .
4. Enter the Name of the SCORM package as you would like it to display to your audience.
5. In the *Package* area, click  then  and  to locate the SCORM file.
6. Once you've located and chosen the SCORM file, click .
7. Make any other changes to settings that are appropriate (none are necessary) and click .
8. The SCORM package will display. It is recommended that you test the file to make sure that everything is working properly.
