

# Connect to the VPN with iOS

This tutorial will show you how to configure the Cisco VPN on your iPhone or iPad.

1. Install the Cisco AnyConnect app from the App Store: <https://itunes.apple.com/us/app/cisco-anyconnect/id1135064690>.
2. Open the Cisco AnyConnect app. If you receive a notification about adding a VPN connection, it is safe to chose **OK**.

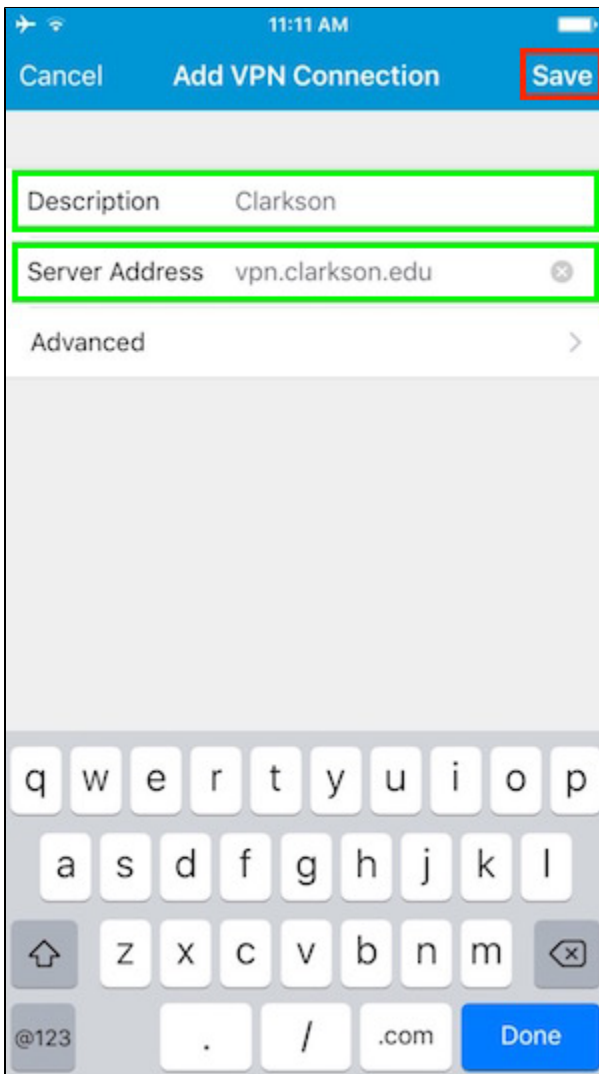

3. Tap **Connections** and then **Add VPN Connection...**

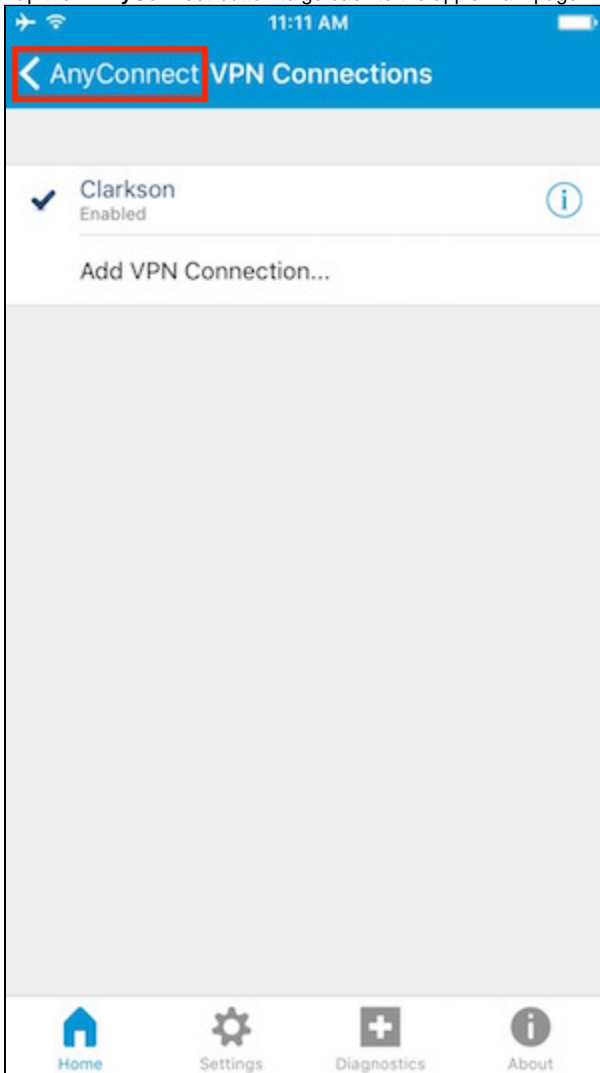

4. Enter the following details and then tap **Save**.

Description: **Clarkson**

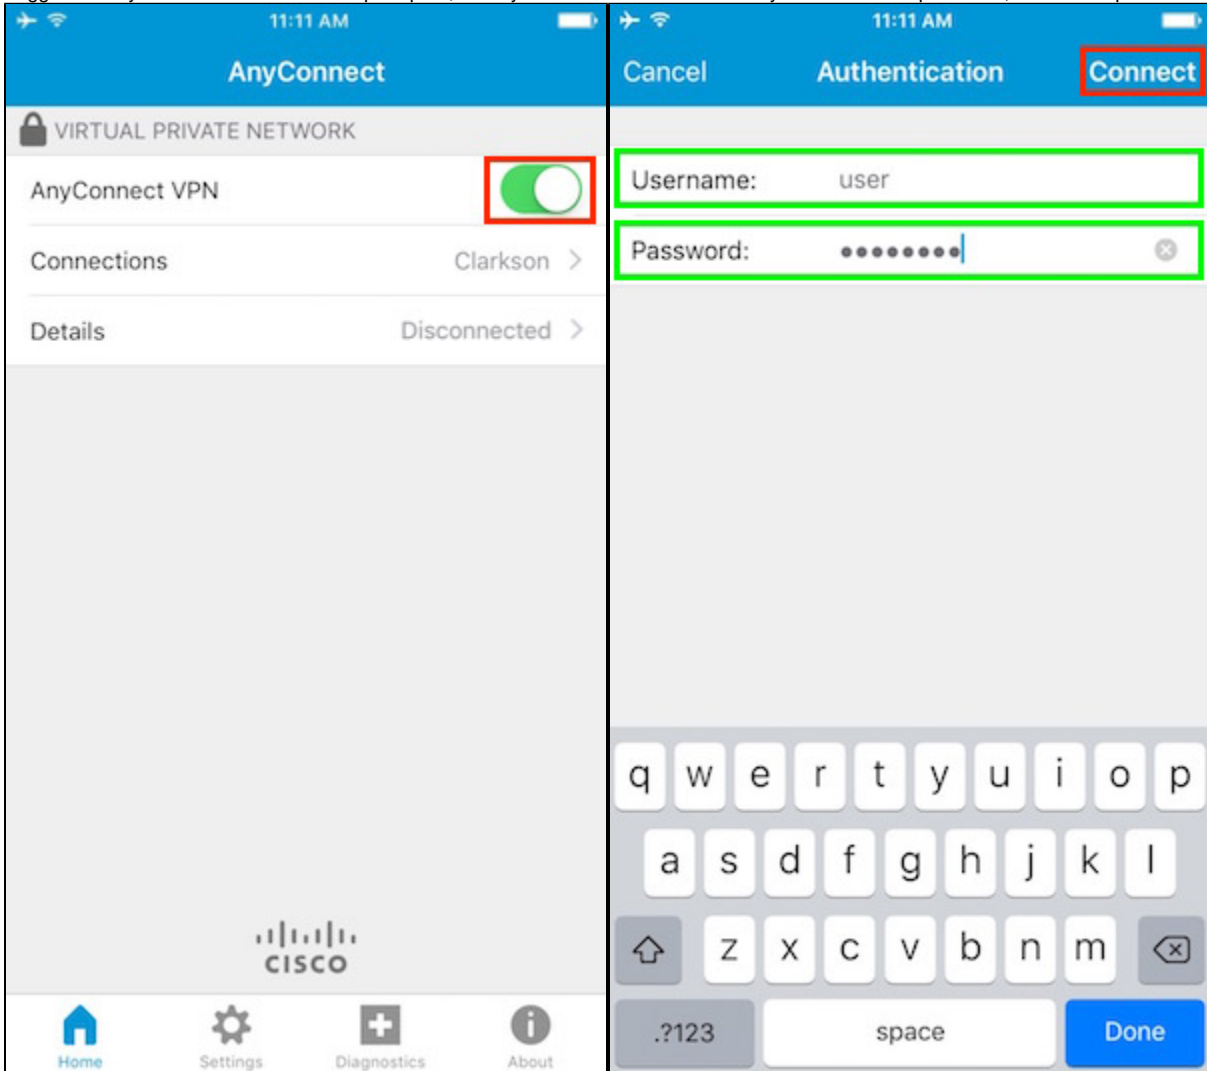

Server Address: **vpn.clarkson.edu**

5. Tap the < **AnyConnect** button to go back to the app's main page.

6. Toggle the AnyConnect VPN **ON**. When prompted, enter your Clarkson Active Directory username and password, and then tap **Connect**.

7. You are now connected to the VPN. The app shows **Connected** and the **VPN** icon appears in the status bar. You may close the app.
