

Student Email / Drive to Non-Clarkson Accounts Transitions

Students graduating from Clarkson will be given access to e-mail for one year after graduation. [Complete University policy here.](#)

SEAMLESS GRADUATION TRANSITIONS

[G Suite for Education offers a feature that will help graduating students with their transition.](#) The feature allows students to copy emails and Drive files from their G Suite for Education accounts into another Google account before they leave the domain. This will enable students to easily retain their email, essays, resumes, science projects and any other files stored on Google Drive if their school removes access to their old account.

You MUST open the email transfer tool in the browser window that has your Clarkson email account open in a different tab or window.
