

Connect to the VPN with Android

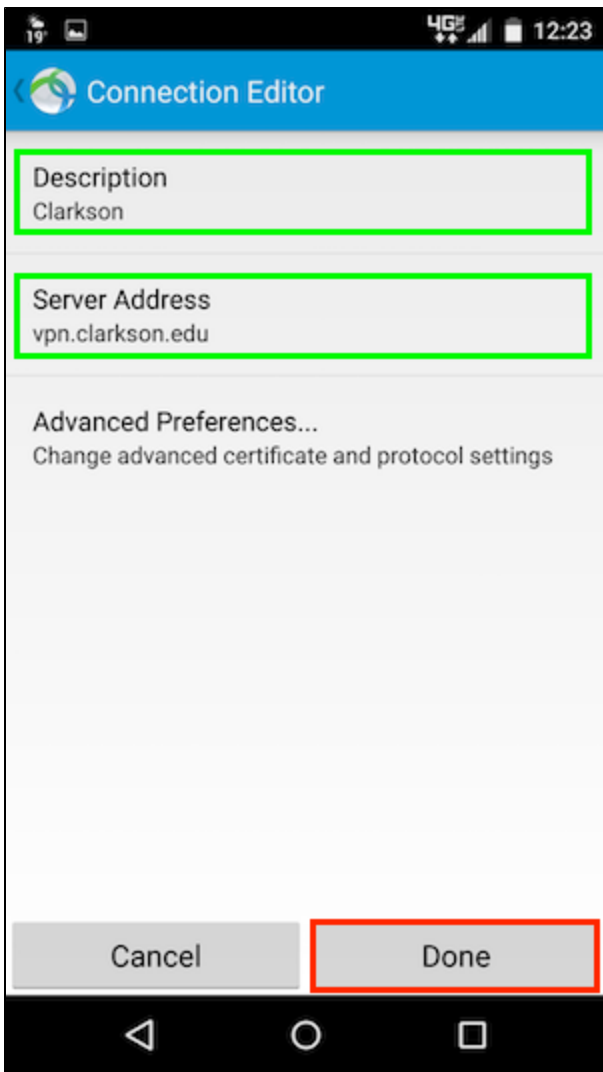

This tutorial will show you how to configure the Cisco VPN on your Android device.

1. Install the Cisco AnyConnect app from the App Store: <https://play.google.com/store/apps/details?id=com.cisco.anyconnect.vpn.android.avf>.
2. Open the Cisco AnyConnect app. Tap **Connections** and then **Add VPN Connection...**

3. Enter the following details and then tap **Done**.

Description: **Clarkson**
Server Address: **vpn.clarkson.edu**

Description
Clarkson

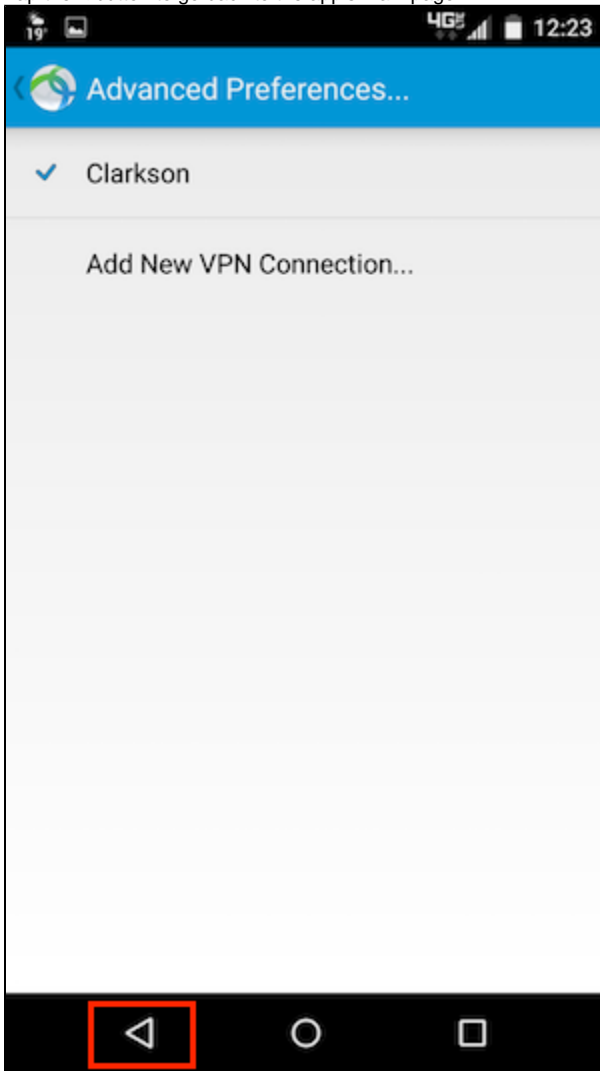

Server Address
vpn.clarkson.edu

Advanced Preferences...
Change advanced certificate and protocol settings

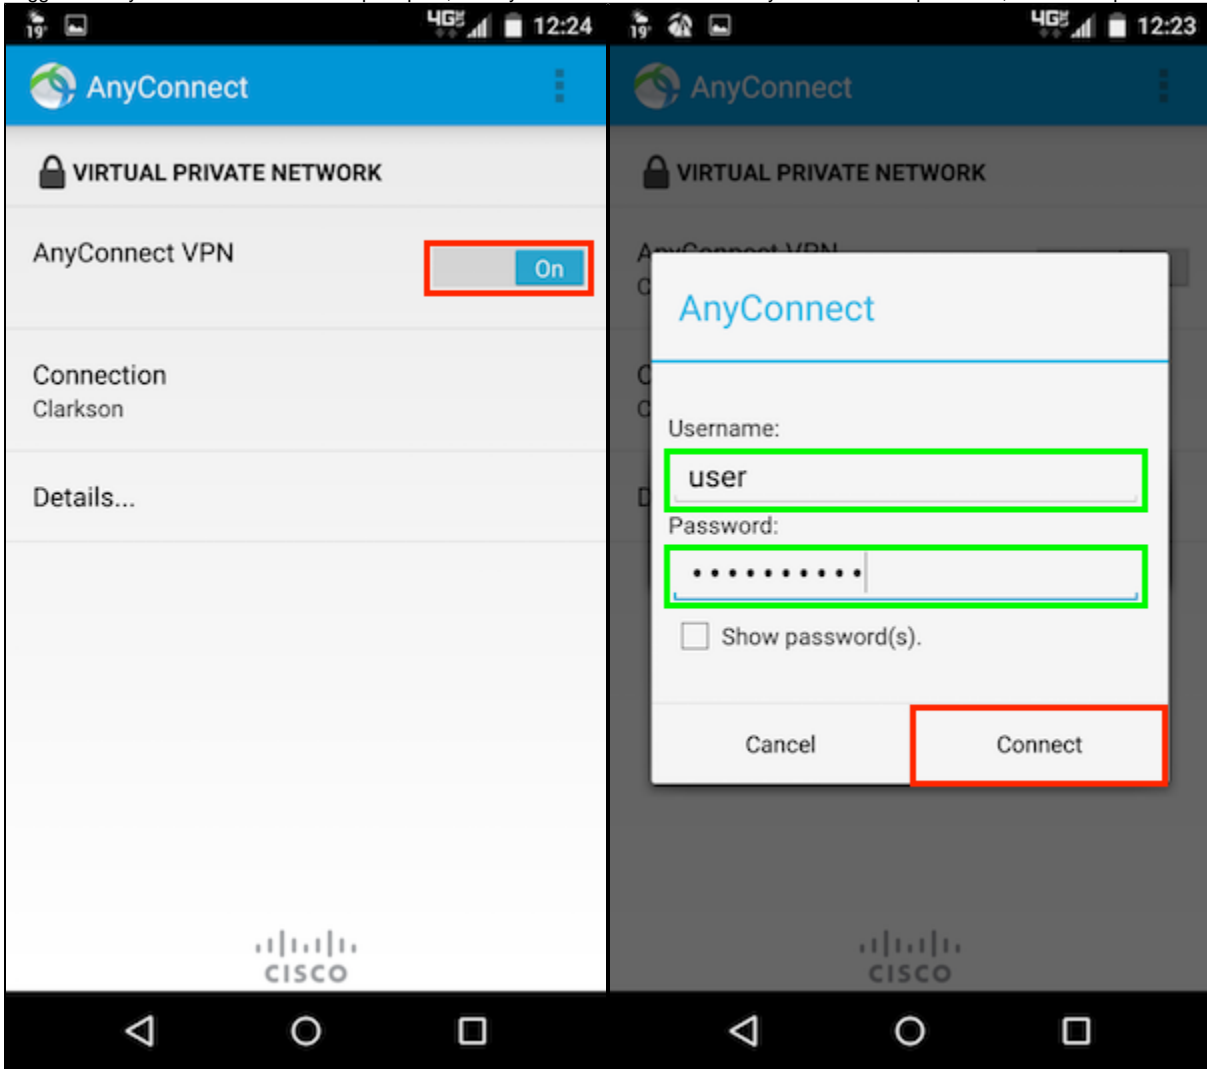

Cancel

Done

4. Tap the < button to go back to the app's main page.

5. Toggle the AnyConnect VPN **On**. When prompted, enter your Clarkson Active Directory username and password, and then tap **Connect**.

6. If you receive a notification about adding a VPN connection, it is safe to choose **OK**.

7. You are now connected to the VPN. The app shows **Connected** and the **VPN** icon appears in the status bar. You may close the app.
